Bootcamp Overview

Live Sessions

Join expert-led, live training sessions streamed on YouTube, focused on building in-demand AWS cloud skills through real-time instruction, interactive Q&A, hands-on walkthroughs, and guided demos. Session replays are available for participants to review and reinforce their learning at any time.

Mentorship

Receive personalized, 1-on-1 mentorship from experienced professionals who have walked the path you're on. Whether you're seeking help with project direction, or career advice, this direct guidance ensures you stay motivated, focused, and continuously improving.

Learning Platform

Get access to a structured, self-paced AWS Fundamentals course via our Learning Management System (LMS). The course includes on-demand video lessons, quizzes, and progress tracking to guide your learning journey. Upon completion, you'll receive a Certificate of Completion to validate your skills and training effort.

Recognition

Participants who complete the CSN Bootcamp receive a Certificate of Achievement as formal recognition of their commitment, learning, and growth. It serves as a valuable addition to your professional profile and a testament to your readiness for real-world cloud opportunities.

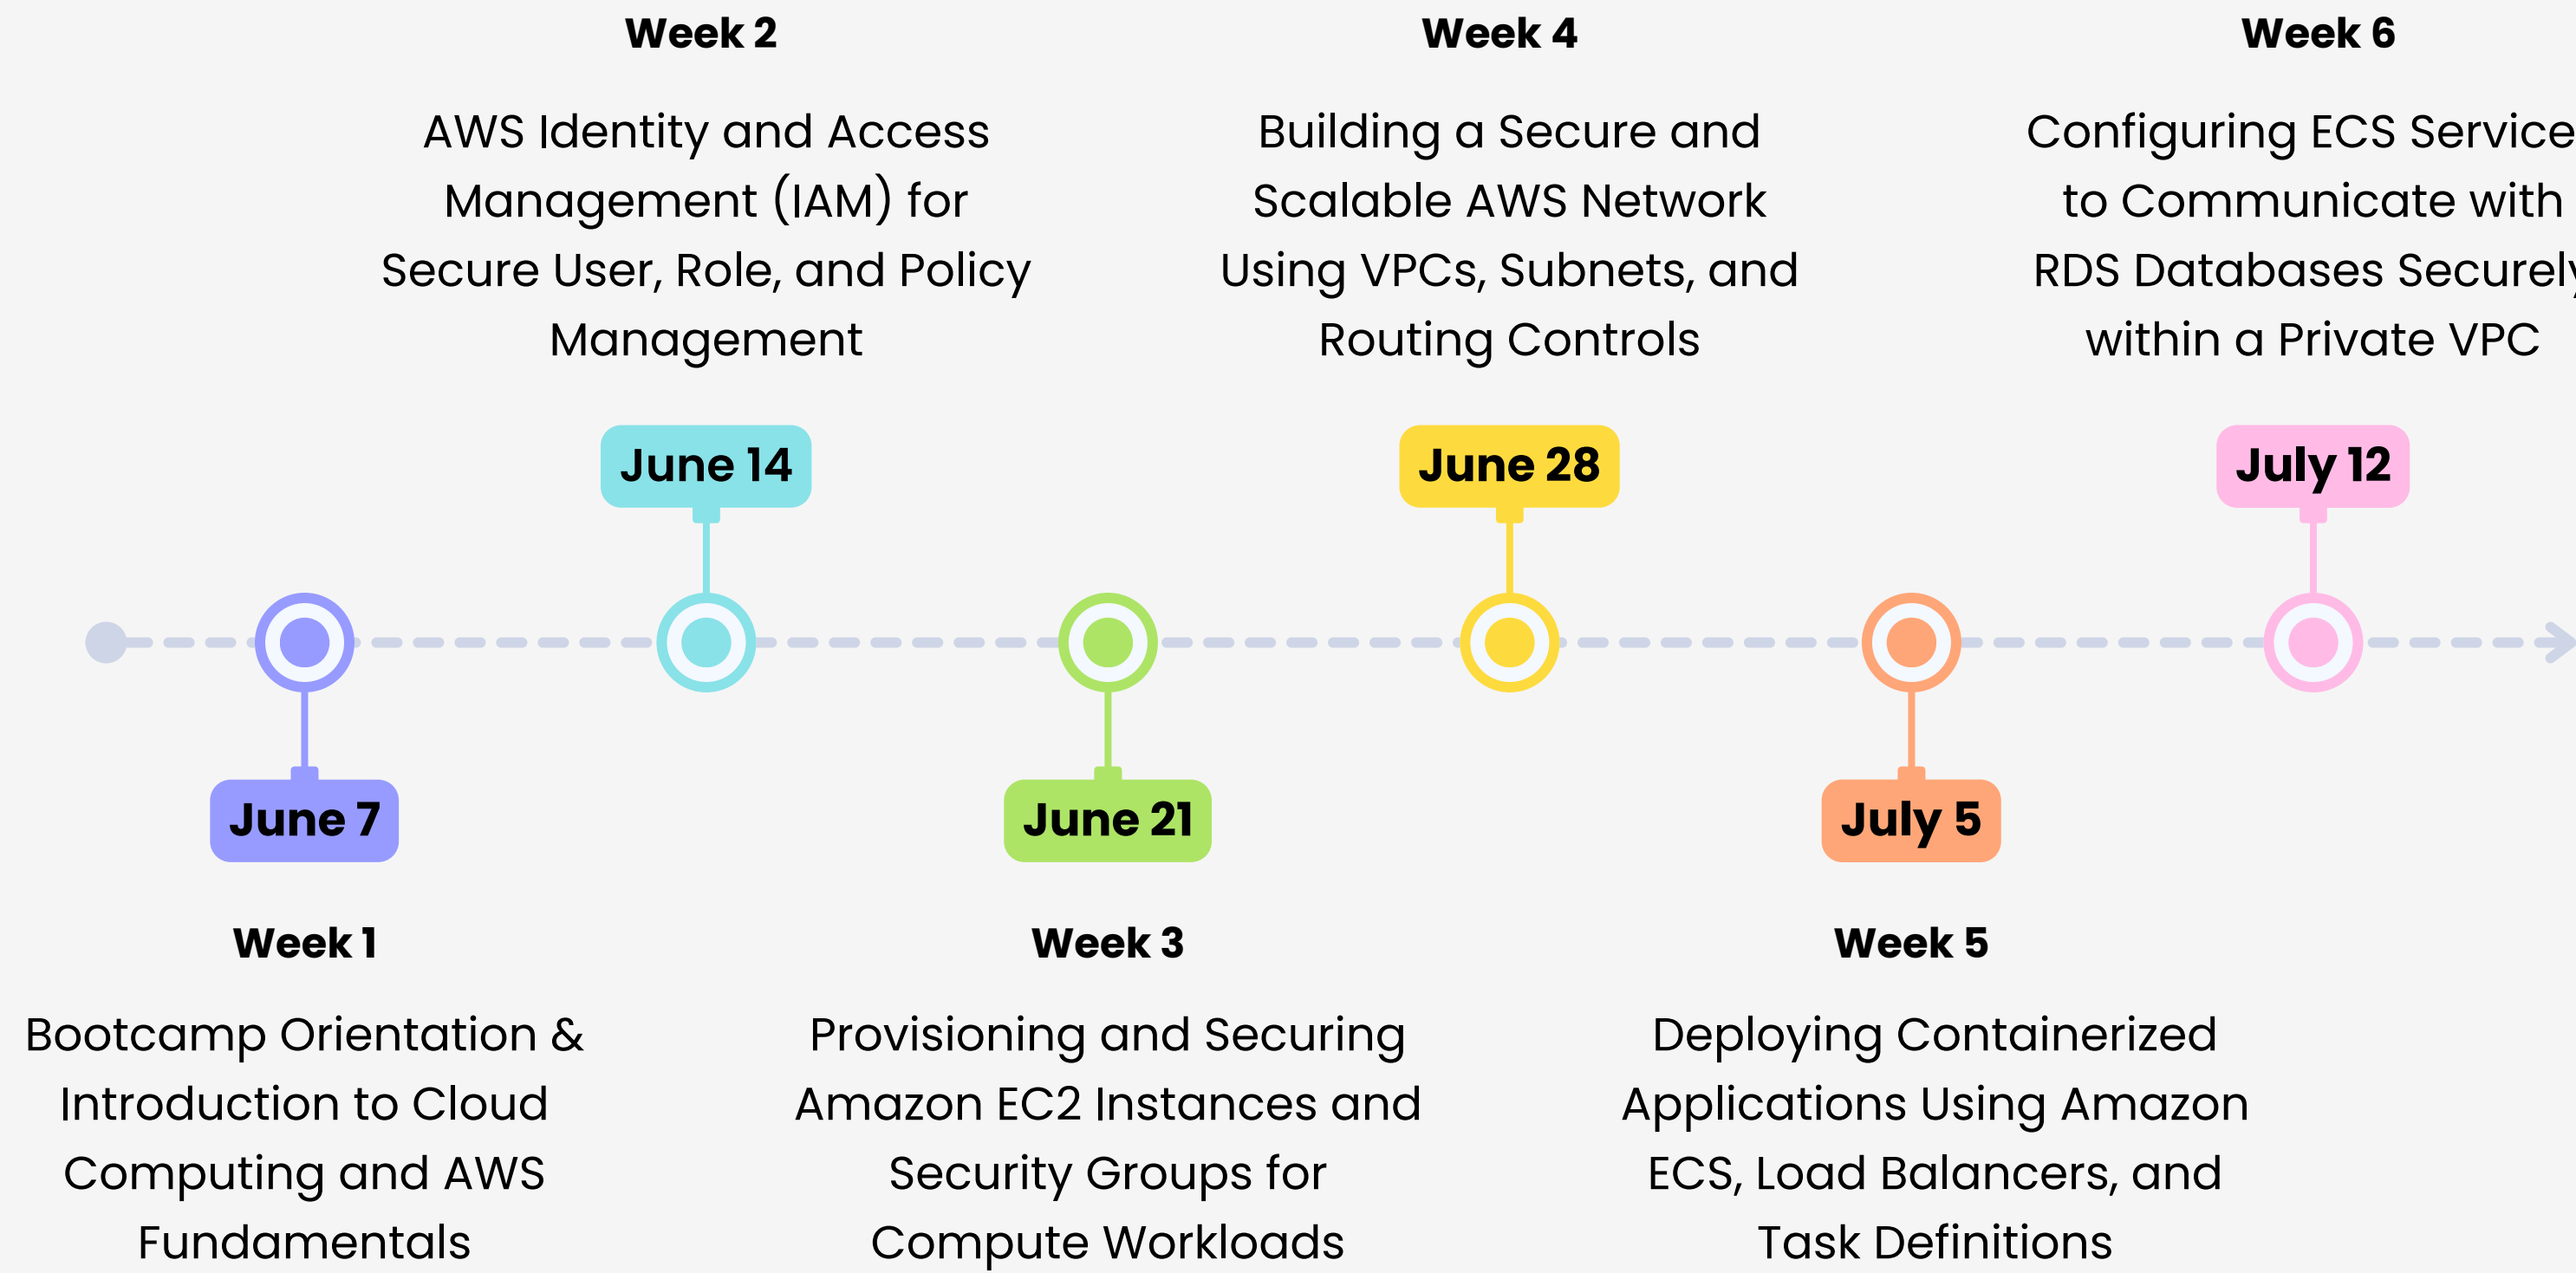

Interactive Labs

Strengthen your practical skills in a real AWS environment with guided, browser-accessible labs. These labs simulate real-world cloud scenarios, allowing you to apply concepts through hands-on exercises and structured challenges. Access is granted to select participants based on performance and engagement.

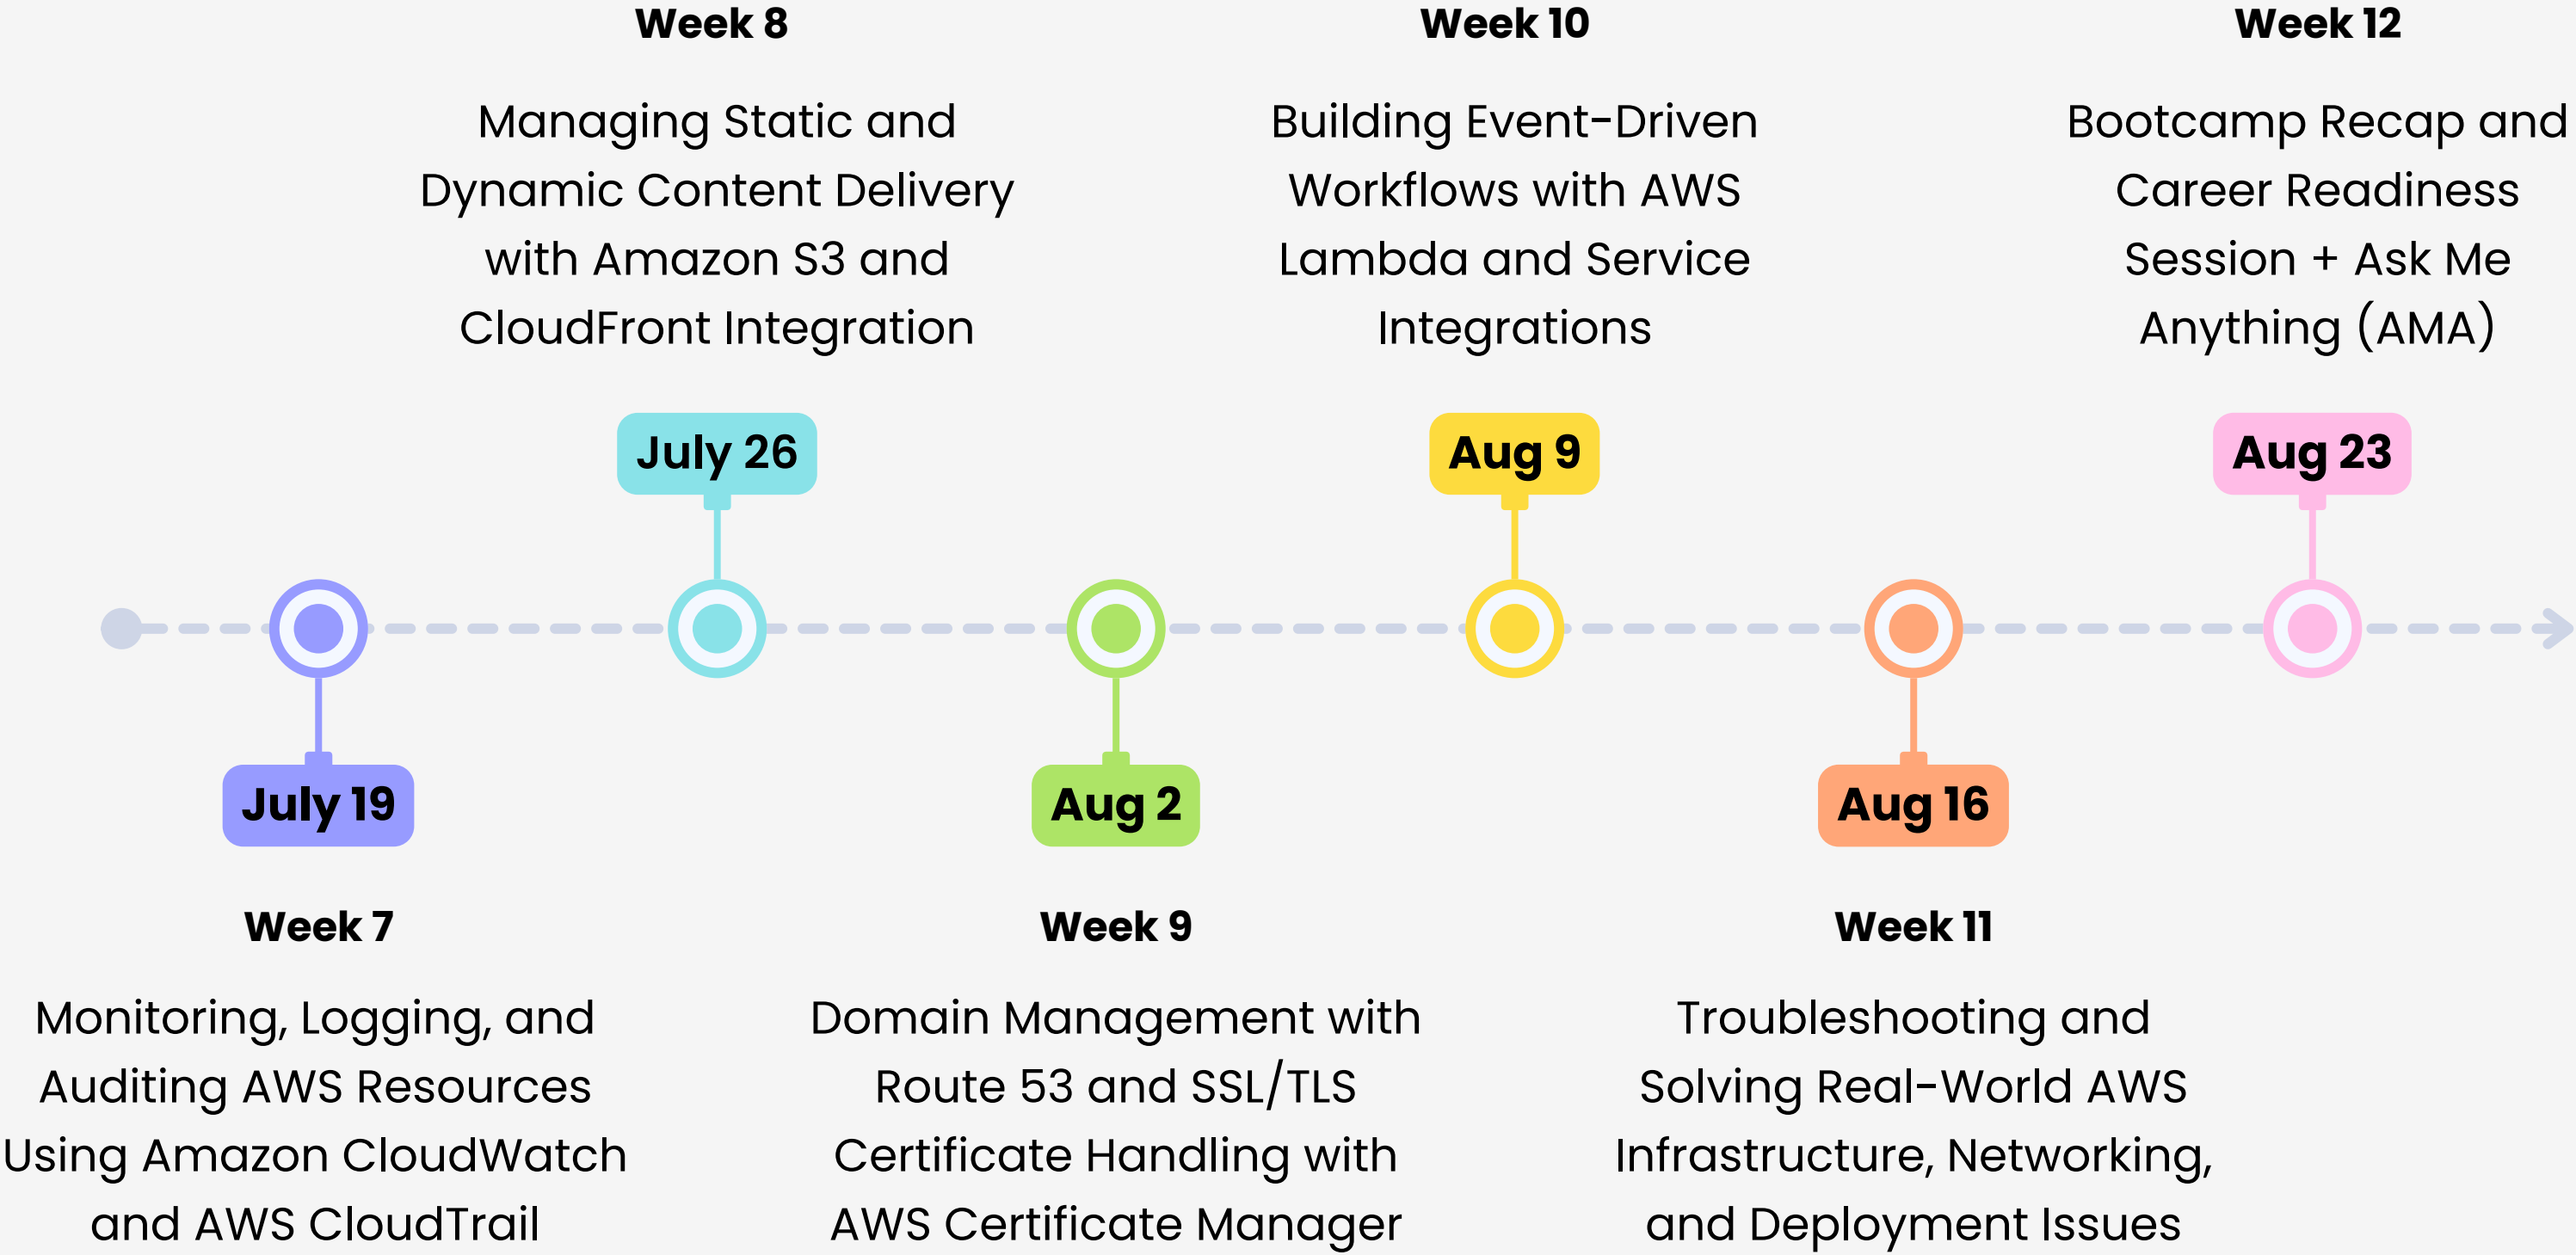

Internship

Select participants will receive a 3-month internship within CSN, working on real-world projects and gaining exposure to professional tools and workflows in cloud and cybersecurity. Top performers may be offered an extension to further their growth and contributions.
